From start to finish...
You're in safe hands

- ✓ High quality, local and reliable
- ✓ Heating **Installations & Maintenance**
- ✓ Full Bathroom Installation Services
- ✓ Experts in **Gas, Oil, LPG** and **Renewable energy solutions**

APPROVED INSTALLER

✓ Bathrooms

Aqua Plumbing & Heating Services Ltd will carry out all forms of bathroom re-fits from replacing like-for-like to altering the whole layout. Even if you dream of turning a bedroom into a bathroom/ shower room, just give us a call. We carry out all the associated work too, from tiling to plastering, basically any bathroom alteration work which may be required. If you would like to see the latest bathroom ranges and accessories simply give us a call, we work alongside the leading bathroom showrooms in the local area.

✓ Central Heating

We carry out all types of central heating related projects including the following:

- Any size of central heating system, even if it's from day one, whether it's a **domestic** or **commercial** property.
- We can advise on any system, whether it's fuelled by **natural gas, LPG** or **oil**.
- We will carry out a survey and advise on the most suitable central heating system for your property. We can recommend upgrades for your existing central heating system, e.g: **new thermostatic radiator valves, pumps, tanks, motorised valves, controls and power flushing** etc.
- We can advise on replacement boilers which are far more energy and therefore fuel bill efficient.
- Annual gas boiler servicing.

✓ Total Plumbing Service

Whether your requirement is water or gas related, we will be able to carry out the work swiftly and efficiently.

We are experienced in carrying out any plumbing requirement from replacing taps to completely re-plumbing a property from scratch. We can also fit water softeners and filtration units.

Whatever your plumbing requirement, from updates to installing power shower pumps or mains pressurised hot water tanks to dramatically improving your hot water pressure throughout the house, we have the solution.

✓ Renewable Energy

Generate your own energy and protect yourself from rising fuel costs. Here at Aqua Plumbing & Heating Services Ltd it is vital that we, as plumbing and heating specialists, remain at the forefront of providing a range of renewable energy solutions for our customer's homes.

Whether it's Solar Thermal, Solar PV, Biomass Wood Pellet Boilers or Ground or Air source heat pumps.

We understand that customers want **greater energy efficiency, lower fuel bills** and a **reduction in their carbon footprint** and it's our aim to help them achieve all three.

We offer:

- Experience in the field of renewable energy installations.
- Accredited installers.
- Staff experienced in installing a wide range of renewable energy solutions.
- A specified system design, using high quality components, suited to your home and energy consumption requirements.
